		DEPARTMENT OF PUBLIC WORKS REPORT DPW -2021- 07	
Prepared:	September 30, 2021	Pages:	1 of 1
Meeting:	Committee of Whole	Attachments:	<input type="checkbox"/>
Subject:	October 2021 Update; DPW		

GENERAL SERVICE HIGHLIGHTS

Work continues clearing of overgrowth along easements for increased visibility and to aid in snow operations while clearing the roads.

Started replacing stop signs throughout the village that were identified as improper sized. Also, replacing signage that is faded and non-reflective to high reflectivity for improved safety.

Last day of Monday biobag pickup is October 11th.

First round of bulk leaf pickup begins October 18 thru the 22nd. We will pick up as needed the following week and then back on for the first week of November thru the 5th. May adjust the timing, our goal is to have everything cleared and wrapped up asap. Weather and foliage dependent is always the great factor.

Park doors to bathrooms are being refinished at Sutton Park, catch basin cleaning is scheduled for October, preparation of winter operations has begun.

UTILITY HIGHLIGHTS

Village Main Lift Station is back operating under normal conditions. Recap both pump motors have been rebuilt and impellers properly adjusted. Vactor was sent to clean Elm St down thru 4th to S. Shore Drive and was discovered to have multiple wipes in the system. Wipes have been the largest contributing factor to stopping up the pumps.

Chlorination of water system starts October 4th thru the 8th along with hydrant flushing and winterization.

Sewer cleaning, pump station, and manhole inspections village wide to take place in October, goal is to clean the entire collections system.

EGLE Lead and Copper samples were collected in the beginning of August as required and results came back in compliance for all sites sampled.
