GENERAL SERVICE HIGHLIGHTS

Park maintenance has ended for the season and all public restrooms have been winterized.

Winter operations update: Vehicles that have needed tires has been completed. Replacement of cutting blades for the underbody scraper have been ordered and should be ready for pickup anytime.

Bulk leaf pickup started October 30th and the last day of pick up will be November 13th.

UTILITY HIGHLIGHTS

Distribution System of Materials Inventory (DSMI) which corelates with the Water Reliability Study as mentioned in prior reports, is ready to start after village water supply chlorination next week. Other tasks include coinciding with the DSMI is a GIS integrated Cross Connection Program. Both programs will be part of the Village GIS system. Our department will be out “daylighting” randomized residential water leads within our distribution system.

We will be working on testing DSMI application and finalizing any issues with the program on a few select lead service line sites.

Harbor Heights Update: Bacteriological test results from developer were completed. Storm water infrastructure and water service taps need yet to be installed. No activity onsite for the past month.

The sewer lining project experienced main line structural failure in a section of existing cement pipe material that will have to be replaced. Update: The work has been completed, new piping installed, new manhole structures to replace the crumbling brick lined structures. Front St was open to all traffic on 11/2/2023. KAL excavating was instrumental in quickly and successfully resolving this infrastructure failure.

REGULATORY HIGHLIGHTS

Village water supply monthly sample results were all clear. Chlorination was completed on 10/6/2023 along with hydrant flushing. We will begin winterization of the community fire hydrants the week of 11/6/23.

2024 Lead and Copper sampling will be conducted during the summer months according to our permit schedule.
